

# Digitalisation for a Sustainable Economy

## ASA Kaleidoskop 2018 – Programme

Date: 26 October 2018

Venue: CODE\_n SPACES, Stuttgart, Germany

Conference language: English

Undisputedly, the global digital shift has not only redefined the way we communicate and our perception of time, but has also proven itself most effective in terms of breaking traditional boundaries such as those of mobility, access to education, health care or access to information.

How does digitalisation affect our societies? What role can economic and social actors play to make our digital reality more beneficial for everybody? This year's ASA Kaleidoskop will focus on the impact of digitalisation on Sustainable Development and Sustainable Business. The event comprises key notes, workshops, pitches, in-between activities and a lot of networking opportunities. It will highlight the following questions:

- Are we steering towards a digital future which will be more beneficial for global equality and for the environment? Or are we moving towards a future where access to wealth and information are even more exclusive than they are today?
- What (entrepreneurial) skills are necessary to handle digitalisation and to make it an effective instrument for sustainable development?
- What best practices can we find in the area of ICT for Development / Tech for Good?
- What digital best practices are there in terms of African-German partnerships?

### On the ASA Kaleidoskop

The ASA Kaleidoskop is the ASA Programme's annual dialogue and networking event on sustainable business. It brings together members of the ASA network with stakeholders from the economy and civil society to discuss ideas and develop strategies for a more sustainable global economy. It functions as an international networking platform for collaboration between young change agents and business partners from the Global South and Germany. This year's event is being organised by Engagement Global with its ASA Programme within the framework of the African-German Youth Initiative (AGYI). It is implemented in cooperation with the Baden-Württemberg Foundation for Development Cooperation (SEZ).

### On the ASA Programme

Since 1960, the ASA Programme has been promoting youth exchange and learning worldwide. It supports young and dedicated people to expand their skills and to contribute to sustainable global development by offering training seminars and practice-oriented internships abroad. Increasing the youth's awareness about global interdependencies and their readiness to act as drivers of change in their own countries is at the core of the program. The ASA Programme is funded by the German Federal Ministry of Economic cooperation and development.
